## SUMMER CLUB FUN FUN

Summer has finally arrived! This summer, we are offering 3-hour morning classes for young learners aged between 2 to 5. The course benefits children by nurturing their basic skills of learning through interesting and innovative activities while developing their self-confidence and independence at the same time.

### Class A: Age 2-3

Finger names, shapes and patterns were introduced to children this month. They were able to identify finger names, different shapes and arrange shapes in sequence orders to create patterns. Teachers were delighted to see their enhanced ability in listening to instructions.

#### Upcoming topics in August:

Textures, Sizes, Table Manners

### Class B: Age 4-5

In July, children learnt about a variety of birds and animals such as cheetah, lizard, camel, beaver, ostrich, owl and swallow. They were led on a learning adventure on identifying the animals' main features and exploring what their natural habitats were like.

#### Upcoming topics in August:

Textures, Parks, Traffic Signs

## Sprouts Saplings

# COOKING FUN

There was so much fun to jump into kitchen with Mr John to make some tasty treats! Over the past few weeks children had made sandwiches, salad, pikelets, rainbow popcorn, cupcakes and milkshake. They did get a bit messy... but they all loved working together and experimenting with a variety of ingredients. Fun facts about food, nutrition and kitchen safety rules were also introduced to enrich the children's learning experience.

## Board Games

## Science Fun

In this inspiring, 6-Class science course, children will be exposed to a wide range of interesting science topics. With a focus on water and plants this month, our little explorers had learnt why water is important to us. They were motivated to find out which objects float or sink in water. Children also got the opportunity to grow their own vegetables and observe different stages of plant growth.
